

The main playground structure is a multi-level play set. It features a central platform with a climbing wall on the left side, a series of colorful vertical bars in the middle, and a slide on the right. The slide is composed of three sections: a blue top section, a yellow middle section, and a red bottom section. The structure is supported by yellow poles and has blue roof-like elements. To the right of the main structure is a swing set with two swings, supported by red poles. The entire play area is surrounded by a red safety mat.
